ArcSoft®

algorithm Support

Powerful combination for perfection

By combining dual rear camera and ArcSoft algorithm support, X3 greatly enhances the image quality in terms of sharpness, saturation, brightness, details, etc., and opens up additional image effects, superior portrait modes as well as long exposure effects in photos.

Moreover, professional portrait background blur, HDR backlight photography, night scenes, beauty mode and super pixel function, panoramic mode, slow-motion mode, 8 on-trend filters, enables you to record every moment of your life.

AI recognition

Mintto 

52MP Super Pixel

Maximizing the clarity

Ultra High Definition mode combines 4 pictures into a single high quality photo, which can reach up to an effective 52MP super pixel resolution. After zooming in several times the image is still sharp with great resolution, leading to a world of clearer view. Clear photos are captured in a backlight environment, with even more colour and detail.

3-in-1 Night Mode

Capture the night

By combining 3 images into 1 the X3 optimises algorithms and parameters to fill in light and reduce noise when shooting at night. The result is high brightness and detailed images.

AI Mode

Capturing images intelligently

X3 adopts the AI camera system, which can easily blur the background of portraits, and intelligently identifies 10 independent scenes. In addition to the scene recognition function, select professional mode for exclusive optimisation of different scenes, to unlock limitless creativity.

The display pictures are simulated images, which are only used for function description purposes.

Adjustable Pro Mode

Shoot Like a Pro

The X3 cameras give you Adjustable Pro Mode with professional shooting parameters. It's easy to adjust parameters according to different scenes, selectable brightness, blurring intensity and colour balance at any time.

Enjoy the professional camera-like shooting experience.

8MP Selfie Camera

Discover the bokeh effect

You can choose a new level of beauty in your portrait selfies. The X3 enables selectable background blurring of the front camera delivering the bokeh effect. With professional beauty mode, X3 creates your best selfie with healthy complexion and skin beautifying effects.

The display pictures are simulated images,

Dual SIM

Designed to be the ultimate travel companion

Be fearless and travel to your favourite destinations with the X3. The Dual SIM feature gives you freedom to connect no matter where you are.

It's another standout feature on all Mintt Smartphones.

Face ID x Fingerprint

Unlock More Security

Double unlock brings more convenience and protection.

When you activate the screen, Face ID unlocks your phone instantly.
Or choose the fingerprint unlock option.

It's all about you and your privacy.

Advanced Performance

Redefining your Smartphone experience

X3 is equipped with Helio P22, an advanced 12nm process processor with Octa-core architecture of MTK. Its high performance and communication capacity brings better operation and data management. With up to 3GB RAM, 64GB ROM, expandable up to 256GB, daily operation and storage requirements can easily meet your needs.

Smart Antenna Tuning

For optimal signal

The smart antenna tuning of X3 integrated tunable capacitors offers excellent RF performance, low power consumption and high linearity required in adaptive RF tuning applications. This makes the signal stronger, so there are less worries in a weak signal environment.

X3:Specifications

Appearance	Gradient Design with 8.1mm slim body
